Software Project PDF Generator

1. Introduction
2. Approach

1. Introduction

Developers require a way to showcase their projects and ideas to others. The utility, solution, and beauty, within a piece of software can be lost if not effectively communicated.

This tool seeks to allow developers to showcase their work in a standardised format, so that they can focus on what they love - producing great software.

2. Approach

test paragraph 2

html

some text `<p>` hey there`</p>`
another line of ``text``

1. Item one
2. Item two
3. Item 3

- Item one
- Item two
- Item 3
