Software Project PDF Generator
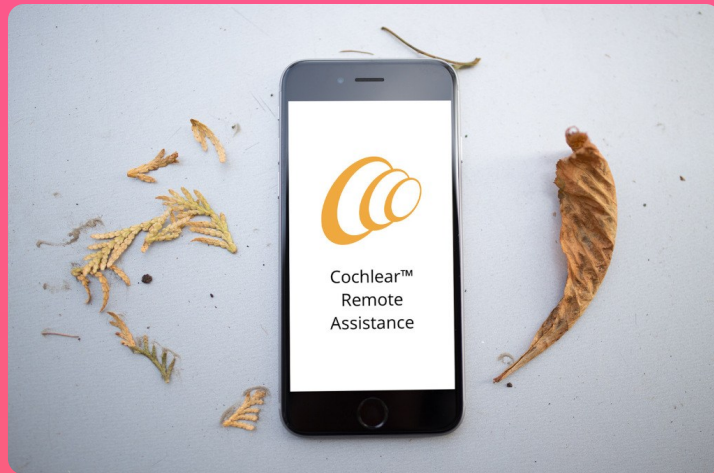

A JavaScript tool to generate beautiful PDF documents for your projects.

Built on:

Software Project PDF Generator

   - This is a h2 header!

1. Introduction

Developers require a way to showcase their projects and ideas to others. The utility, solution, and beauty, within a piece of software can be lost if not effectively communicated.

This tool seeks to allow developers to showcase their work in a standardised format, so that they can focus on what they love - producing great software.

2. Approach

This is a h2 header!

test paragraph 2

```html
some text <p> hey there</p>
another line of <strong>text</strong>
```

1. Item one
2. Item two
3. Item 3

- Item one
- Item two
- Item 3
